

Short CV Dr. Jens Lehmann

Prof. Dr. Jens Lehmann (<http://www.jens-lehmann.org>) leads the „Smart Data Analytics“ research group at the University of Bonn and Fraunhofer IAIS with 40 researchers. His research interests involve knowledge graphs, machine learning, question answering & dialogue systems. Prof. Lehmann authored more than 200 articles in international journals and conferences cited more than 20000 times according to Google Scholar. In several major conferences and journals, he has leading positions (European Data Forum general chair, SWJ editorial board, AAAI/IJCAI senior PC member for several years, ESWC track chair). He is founder, leader or contributor of several community research projects, including SANSA, DL-Learner, DBpedia and LinkedGeoData. He leads research activities in the large-scale OpenGPT-X and SPEAKER projects, and coordinated the EU FP7 project GeoKnow along with several other leading roles in large-scale European and national collaborative research projects. Previously, he completed his PhD with „summa cum laude“ at the University of Leipzig with visits to the University of Oxford and studied Computer Science at the Technical University of Dresden (grade 1.1).
